## **DETAILED ACTION**

### ***Information Disclosure Statement***

1. The information disclosure statement filed 4/14/05 and 5/16/06 fails to comply with 37 CFR 1.98(a)(3) because it does not include a concise explanation of the relevance, as it is presently understood by the individual designated in 37 CFR 1.56(c) most knowledgeable about the content of the information, of each patent listed. It has been placed in the application file, but the information referred to therein has not been considered.

The Examiner notes that the Information Disclosure Statements dated 4/14/05 and 5/16/06 contain 118 references. The application is requested to highlight those documents which have been specifically brought to applicant's attention and/or are known to be of most significance.

### **MPEP 2004 Aids to Compliance with Duty of Disclosure**

It is desirable to avoid the submission of long lists of documents if it can be avoided. Eliminate clearly irrelevant and marginally pertinent cumulative information. If a long list is submitted, highlight those documents which have been specifically brought to applicant's attention and/or are known to be of most significance. See *Penn Yan Boats, Inc. v. Sea Lark Boats, Inc.*, 359 F. Supp. 948, 175 USPQ 260 (S.D. Fla. 1972), *aff'd*, 479 F.2d 1338, 178 USPQ 577 (5th Cir. 1973), *cert. denied*, 414 U.S. 874 (1974). But cf. *Molins PLC v. Textron Inc.*, 48 F.3d 1172, 33 USPQ2d 1823 (Fed. Cir. 1995).

### ***Drawings***

2. Figures 2-4 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not

Art Unit: 2851

accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

3. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference character “70” has been used to designate both “an actuator” and “a force sensor” (for example, see page 15, lines 1-3 and line 8). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either “Replacement Sheet” or “New Sheet” pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Ex parte Quayle***

4. This application is in condition for allowance except for the above mentioned formal matters.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

***Allowable Subject Matter***

5. The following is a statement of reasons for the indication of allowable subject matter: Claims 1-17 have been found to be allowable since while the prior art teaches an immersion

Art Unit: 2851

exposure apparatus having a liquid supply system for supplying an immersion liquid to a space between the projection optical system and the substrate and a controller for controlling the wafer substrate stage but the prior art does not specifically teach an actuator configured to apply a force to the substrate along with a compensation controller configured to determine a compensating force to be applied by the actuator to the substrate to be substantially equal in magnitude and substantially opposite in direction to a force applied to the substrate by the liquid supply system.

6. Claims 18-28 have been found to be allowable since the prior art either alone or in combination, neither discloses nor makes obvious the combination of a device manufacturing method comprising among other steps, a steps of determining and applying a compensating force on the substrate substantially equal in magnitude and opposite in direction to force applied to the substrate by a liquid supply system providing the immersion liquid, as recited in the instant claims of the present application.

***Prior Art Made of Record***

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Suwa (U.S.Pat. 5,825,043) and Takahashi (U.S. Pat. 5,610,683) have been cited for teaching of immersion type exposure apparatuses.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hung Henry V. Nguyen whose telephone number is 571-272-2124. The examiner can normally be reached on Monday-Friday (First Friday off).
